Q&A

1 Why Generate

Alternate text: Why Generate

 **Generate**

Alternate text: Architecture diagram showing the SEA Data System and its databases connecting to the Generate reporting tool, which uses the CEDS data standard

Generate Status Nationally

22 SEAs currently implementing Generate

17

States with current CIID intensive support

- Iowa
- Colorado
- Kansas
- Maine
- Michigan
- Minnesota
- Mississippi
- Montana
- Nebraska
- New Hampshire
- New Jersey
- Oklahoma
- South Carolina
- Utah
- Vermont
- Washington
- West Virginia

5

Additional States are implementing or have implemented

- Nevada
- Kentucky
- Minnesota
- Bureau Indian Education
- Commonwealth Northern Mariana Islands

Iowa's EdFacts journey

Where we've been and where we are going

Alternate text: Iowa's EdFacts journey
Where we've been and where we are going

Infrastructure overview

- Iowa data collection modernization strategy
- Revamped student level collection built on A4L SIF/Unity
- Iowa's SLDS is a system of systems jointly owned and governed by multiple agencies within and outside the Iowa Department of Education

Alternate text: Infrastructure overview

- Iowa data collection modernization strategy
- Revamped student level collection built on A4L SIF/Unity
- Iowa's SLDS is a system of systems jointly owned and governed by multiple agencies within and outside the Iowa Department of Education

Project History

- EdFacts files contain data from multiple sources
- Most are compiled manually using SAS and pockets of old school spreadsheets
- Requires significant coordination and communication
- Uneven QA efforts
- Latency in review by program offices

10

EdFacts files contain data from multiple sources
Most are compiled manually using SAS and pockets of old school spreadsheets

Requires significant coordination and communication
Uneven QA efforts
Latency in review by program offices

Opting for Generate

-  Some CEDS groundwork in place already
-  Streamline and improve EdFacts reporting
-  Impending retirement of EdFacts coordinator
-  Funding via FY19 SLDS Grant
-  Technical assistance from CIID

Alternate text: Opting for Generate

-  Some CEDS groundwork in place already
-  Streamline and improve EdFacts reporting
-  Impending retirement of EdFacts coordinator
-  Funding via FY19 SLDS Grant
-  Technical assistance from CIID

Project Goals

- Improve efficiency through automation - eliminate wait times for manually pulling data
- Reduce error risk
 - Less manual work
 - More time, better format for data steward review
- Improve data quality
 - Retrieve data at the source
 - Use Generate's built-in QC

12

Alternate text: Project Goals

- Improve efficiency through automation - eliminate wait times for manually pulling data
- Reduce error risk
 - Less manual work
 - More time, better format for data steward review
- Improve data quality
 - Retrieve data at the source
 - Use Generate's built-in QC

Current Project Status

- ✓ Map data elements to CEDS
- ✓ Validate CEDS mappings
- ✓ Review business rules
- ☐ Write and validate ETL code (in process)
- ☐ Stand up Generate in dev environment
- ☐ Run new ETL on prior year source data and compare to prior year EdFacts submissions
- ☐ Update process, mappings, and code as needed

13

SEA Data Collections and Constant Change

Alternate text: Architecture diagram titled “SEA Data Collections and Constant Change”, showing Iowa’s 327 school districts sending data to Cedar Connect, which then provides data to many other internal Iowa systems, state data collection, and downstream applications.

About Cedar Labs

- Solutions for data integration, validation, state and federal reporting, and data privacy
- Statewide implementations across the US and Australia, serving over 3 million students
- Cloud-native technology provides scalable, real-time integration
- Standards-agnostic approach: “meet them where they are”

16

Solutions for data integration, validation, state and federal reporting, and data privacy

Statewide implementations across the US and Australia, serving over 3 million students

Cloud-native technology provides scalable, real-time integration

Standards-agnostic approach: “meet them where they are”

Why SIF

- Longstanding, effective infrastructure in place based on SIF standard
- CEDS-aligned with common vocabulary
- Modern REST API
- Supports cloud-native technology
- [Performance test](#) demonstrated ability to process 350m records / hour

17

Alternate text: Why SIF

Longstanding, effective infrastructure in place based on SIF standard
CEDS-aligned with common vocabulary
Modern REST API
Supports cloud-native technology
[Performance test](https://cdn.ymaws.com/www.a4l.org/resource/resmgr/docs/whitepaper/real_world_eddata_mgmt_perf.pdf) demonstrated ability to process 350m records / hour (link to: https://cdn.ymaws.com/www.a4l.org/resource/resmgr/docs/whitepaper/real_world_eddata_mgmt_perf.pdf)

Project Goals

- Leverage existing infrastructure to create a seamless Generate implementation
- Apply SIF → CEDS mapping in a real-world environment
- Identify and eliminate barriers to future implementations in the community
- Realize success in a short timeline

Alternate text: Project Goals

Leverage existing infrastructure to create a seamless Generate implementation

Apply SIF → CEDS mapping in a real-world environment

Identify and eliminate barriers to future implementations in the community

Realize success in a short timeline

Steps to Success

- Map Iowa SIF Profile to Generate reports
- Identify best proof of concept candidate reports
- Deploy CEDS DW and Generate in the cloud (AWS)
- Connect data and create candidate reports
- Compare results for calibration

19

Alternate text: Steps to Success

- Map Iowa SIF Profile to Generate reports
- Identify best proof of concept candidate reports
- Deploy CEDS DW and Generate in the cloud (AWS)
- Connect data and create candidate reports
- Compare results for calibration

Alternate text: The same architecture diagram (titled “SEA Data Collections and Constant Change”) shown earlier, showing Iowa’s 327 school districts sending data to Cedar Connect, which then provides data to many other internal Iowa systems, state data collection, and downstream applications. In this diagram, Cedar Connect also sends data to a Staging table, which then provides data to the CEDS Data Warehouse, which provides data to Generate. The Staging, CEDS DW, and Generate are all on the AWS cloud.

SIF → Generate

- Common vocabulary simplifies process
- SIF *profiles* tend to be focused on state reporting needs
- Five report candidates identified based on:
 - Available data
 - Scope of work given short timeline
 - Breadth of examples for PoC
 - Likely interest level

21

 - Scope of work given short timeline
 - Breadth of examples for PoC
 - Likely interest level

Reports

- 033 Free Reduced Lunch
- 039 Grades Offered
- 052 Membership
- 086 Students Involved with Firearms
- 195 Chronic Absenteeism

Alternate text: Reports

Generate Cloud Deployment

- Goal: Simplify implementation by extending current AWS deployment
- Hurdles:
 - Tightly bound to Active Directory / requires multiple environments
 - Documentation geared towards on prem
- Successes:
 - Built lightweight authentication module
 - Troubleshoot documentation and modified to fit AWS deployment scenario

23

Alternate text: Generate Cloud Deployment

Goal: Simplify implementation by extending current AWS deployment

Hurdles:

- Tightly bound to Active Directory / requires multiple environments
- Documentation geared towards on prem

Successes:

- Built lightweight authentication module
- Troubleshoot documentation and modified to fit AWS deployment scenario

Report Creation

- Mapped all 5 reports from SIF profile to CEDS staging tables
- Populated staging and CEDS DW
- Successfully created all 5 reports via Generate
- Calibration in progress

Alternate text: Report Creation

- Mapped all 5 reports from SIF profile to CEDS staging tables
- Populated staging and CEDS DW
- Successfully created all 5 reports via Generate
- Calibration in progress

Next Steps

- Share Generate Authentication Module code back with Open Source Community
- White paper coming on Generate deployment on AWS
- Review as a team to discuss implications for Generate implementation

25
